

# AUTHENTIGUARD® VERIGLOW™

PUT DOCUMENT SECURITY IN A WHOLE NEW LIGHT

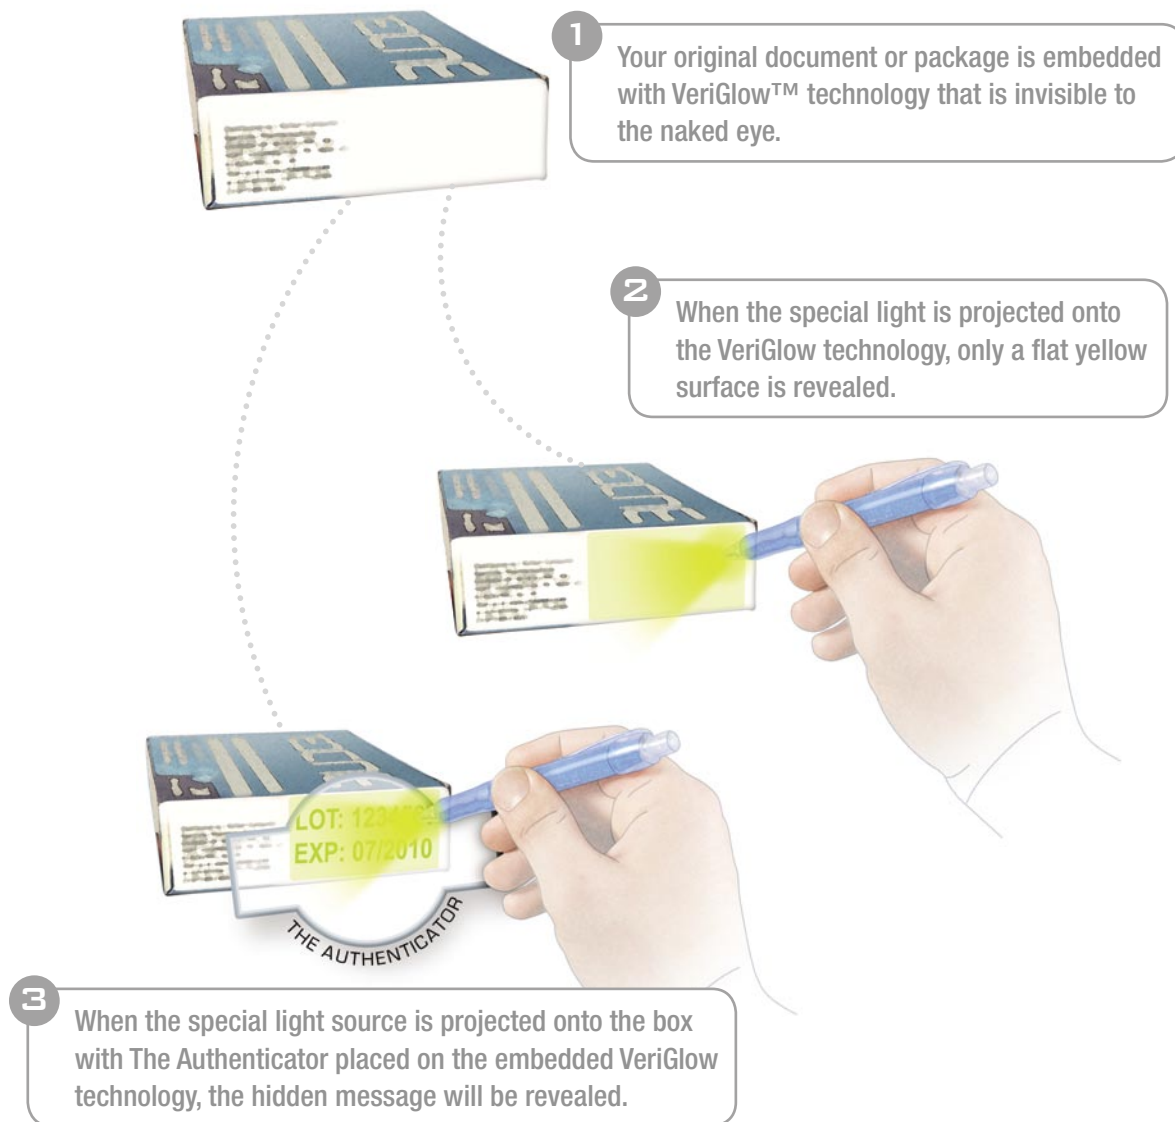

## MARKETPLACE CHALLENGE

Genesis documents, pharmaceutical packaging, manufactured parts, supply chain management systems and more, require unprecedented security technology for verification and authentication.

## AUTHENTIGUARD SOLUTION

AuthentiGuard VeriGlow is a two-tiered, customized document security system that utilizes unique photosensitive inks and incorporates embedded messages and images that are only viewable with a special light source and The Authenticator – a proprietary lens that, together with the special light source, reveals the hidden messages.

## HOW VERIGLOW WORKS

## REAL-WORLD APPLICATIONS

- Packaging
- Labels
- Currency
- ID documents
- Licenses
- Tickets
- Certifications
- Copyrighted material
- Product logos

## HIGHLIGHTS

- Covert verification technology that can't be duplicated.
- Forensic-level security protection for vital documents.
- Uses special inks and embedded verifiers requiring The Authenticator.
- Inks are invisible without proprietary viewing lens and special light.
- Verifier marks can be customized to any application.
- Can be applied anywhere on a document.
- Virtually impossible to be compromised.
- The Authenticator can be custom made for each application.

## VERIFICATION METHODS

- Our proprietary lens, The Authenticator, combined with the special light source, reveals VeriGlow hidden messages, logos or images.

## PRINTING REQUIREMENTS

- VeriGlow ink.

## THE STRONGEST SECURITY FOR YOUR MOST VITAL DOCUMENTS

AuthentiGuard® VeriGlow™ utilizes specially formulated light-sensitive inks and embedded verification marks to create covert images on a printed document. These images are only visible when viewed with The Authenticator under a special light source. This dual technology security has made AuthentiGuard VeriGlow the choice of governments around the world to protect their currencies and most important security credentials.

Invisible without the verification technology, AuthentiGuard VeriGlow can be used anywhere on the document to ensure authenticity. And to help guarantee an unsurpassed level of protection, The Authenticator can be customized.
